IDENTIFIERS Rehabilitation Act 1973 (Section 504)
ABSTRACT
The paper briefly reviews current issues and concerns facing postsecondary schools that provide services to learning disabled (LD) students. The following topics are discussed: college admissions policies, implications of Section 504 of the Rehabilitation Act of 1973, characteristics of LD college students, accommodations to meet their special needs, teaching suggestions for college faculty who have LD students in their classes, and components of a support services program for LD college students. The bulk of the document consists of sample forms (e.g., application forms for student support services) and lists of organizational and print resources. Thirty-three references are also provided. A COLLEGE GUIDE FOR LD SERVICE PROVIDERS

INTRODUCTION

The special needs of the learning disabled (LD) college student are unique and varied. The necessary college preparatory skills are clear, in that, students need to have adequate written language skills, efficient study skills, appropriate social/interpersonal skills, an understanding of his/her abilities and disabilities, realistic goals, and the motivation to attain a future career goal.

Although many of the nations three thousand colleges and universities are enrolling learning disabled students, only a few schools of higher education have developed appropriate LD programs (Salend, Salend, Yanok, 1985; Vogel, 1982). Of those postsecondary schools that are currently developing such programs, the need for an increased number of trained people to coordinate and provide direct services to the learning disabled college student has become more evident and pressing (Shaw, Norlander, 1986).

This paper will review some current issues and concerns facing postsecondary schools. These issues include: admissions policies, implications of Section 504, the special needs of LD students, accommodations, support services, and the best approaches for meeting the needs of LD college students. Sample forms, organizations, and directories for the LD college student are also included (see Appendix).

COLLEGE ADMISSIONS POLICIES AND THE LD STUDENT

Section 504 of the Rehabilitation Act of 1973, refers to the "qualified" handicapped student - which has brought to light many concerns and problems for college admissions personnel (Vogel, 1982). One of the problems being faced by postsecondary institutions is the lack of trained learning disabilities services providers (Shaw, Nelander, 1986). Therefore, another concern is that college personnel serving the handicapped on campus may not be able to recognize or identify a learning disability (Stone, 1983). Lastly, trying to avoid legal entanglement, some colleges accept all LD applicants who identify themselves in the admissions process (Vogel, 1982).

These issues relating to the admissions policies have been directly impacted by Section 504, declining enrollment, and the colleges social obligation to serve various handicapped groups (Parks, Antonoff, 1987). Mangrum and Strichart (1984) have identified the key questions that admissions personnel need to ask:

- (1) Does the applicant have a learning disability?
- (2) Does the applicant have the intellectual ability to do college work?
- (3) What knowledge has the applicant acquired?
- (4) Can the applicant succeed in college?

According to Vogel (1982), many higher education admissions personnel know very little about learning disabilities and often confuse it with retardation. The admissions personnel rely on interviewing skills to evaluate the LD student's motivation and goal direction in attending college. The admissions standards must not discriminate against LD students and administrators need to identify the types of special services and modifications each student requires. The changes in admissions policies that are currently being evaluated and implemented among colleges vary considerably (Barbaro, 1982).

Although many colleges have not made themselves accessible to the learning disabled, there is a growing awareness and many institutions are in the process of planning, initiating or developing LD college programs and/or appropriate accommodations.

SECTION 504 AND ITS IMPLICATIONS

Although Section 504 has been in effect since 1973, its implications are far-reaching and still need to be addressed by many postsecondary institutions. The components that must be reviewed to prevent discriminatory actions have been identified (Putnam, 1984). These include:

Recruitment activities may not be based on the handicapping condition of a student.

Preadmission inquiries as to an applicant's handicap are prohibited.

Decisions about admission concerning the learning disabled applicant revolve around two important questions: (a) what is the learning disability? and (b) how do admissions personnel determine if an applicant is learning disabled?

LD students cannot be denied admission to any program at an institution with open enrollment.

Admission testing may not make use of any test or criteria for admission that has a discriminatory effect on the LD student.

Adjustments besides admission standards to ensure that academic requirements do not discriminate against a handicapped individual must be implemented.

LEARNING DISABILITIES DEFINED

"A learning disability (LD) is a disorder which affects the manner in which individuals with normal or above average intelligence take in, retain and express information. Like interference on the radio or a fuzzy TV picture, incoming or outgoing information may become scrambled as it travels between the eye, ear, or skin, and the brain." (University of Wisconsin)

UNDERSTANDING THE LD COLLEGE STUDENT

The LD college student may be charming, have excellent reasoning abilities and a good memory (Smith, 1985). Often, this student will not seek extra help and has developed keen compensatory skills. Typically, the LD student is aware of his/her disabilities and has employed some coping mechanisms which were successful while others do not. Many of these students have high expectations concerning the amount and type of assistance that the school should provide (Blalock, Dixon, 1982). Also, many LD college applicants will withhold identification information in fear that it will be held against them. After a year in college many of these students experience serious academic difficulties and drop out or are asked to leave the school (Vogel, 1982). Most often, the LD student requires supportive help in order to have a successful college experience.

Although the learning disabled adolescent population is heterogeneous, there are two characteristics that all LD students have in common (1) a discrepancy between apparent ability to learn and actual academic performance due to information-processing deficits that impact on components of learning; and, (2) experience of repeated failures which would be expected to reduce their achievement efforts and task motivation. Therefore, the interaction of cognitive and motivational factors always need to be considered when working with the LD student (Seidenberg, 1986).

ACCOMMODATIONS TO MEET THE NEEDS OF LD COLLEGE STUDENTS

To accommodate an LD college student simply means to acknowledge that the student is intellectually capable of higher education, but information-processing difficulties inhibit him/her from learning. Accommodations can involve alternate ways to complete course work, innovative classroom techniques, supervised tutoring sessions, or use of technological machinery. The process of learning, receiving and demonstrating information learned is not accomplished by course content changes or lowering academic standards, but rather in accommodations for learning disabilities.

Awareness for college professors starts with the knowledge of the nature of the learning disability and the accommodations and support services necessary for the LD students to help themselves. It also means becoming aware of certain teaching habits and professorial attitudes that may increase or decrease the learning process for the LD student.

The following accommodations within the classroom setting may satisfy some of the special needs of the LD student. The accommodations need to be based on the nature of the academic difficulties and the suggestions provided by a support services provider. These accommodations must always be agreed to by the faculty member in whose class the student is enrolled.

- (1) students may dictate answers to an essay examination if this is the best way to demonstrate what he/she has learned
- (2) students may use untimed, special locations for test-taking with supervision
- (3) students may tape a class lecture or lesson
- (4) students may use calculators when a math deficit is best accommodated by this type of aid

SUGGESTIONS FOR COLLEGE FACULTY

When an LD student is enrolled in your class, it is important to encourage that student to use the support services available on campus. It is also helpful to understand the student's learning difficulties by communicating directly with the student and with support personnel. In addition, the following practices are suggested (Wren & Siegel, 1985; Goodey, 1980-1983) which will be of help to all your students. The goal is to enable the LD student to function more independently and with more efficiency.

- During one of the first classes, have students write a short paper (1 or 2 pages) telling where they are from, their educational experience and what their goals are in attending college. Read this paper for information and writing organization rather than for grammar or spelling.
- Provide a clear, detailed syllabus which states an explanation of expectations, selected topics and procedures for each class session. Underline assignment titles, list criteria alphabetically and include a calendar with assignments indicated.
- Emphasize new and/or technical vocabulary. Present new vocabulary on the chalkboard in class and on a handout.
- Structure each session with a review of material from the last class session and an outline of current material. At the end of each class, summarize important points.
- Offer study questions that indicate the relative importance of content as well as the format of possible test questions.
- Structure the class so that all students must participate or are asked to become more involved in the learning process.
- Present materials in a variety of ways. Some students benefit more by seeing the term or having new concepts approached through more than one modality. This may involve listening to new material, saying, writing or demonstrating.
- Students may sit wherever they choose, but certain students should be encouraged to sit closer to the front of the class. This helps the student with difficulty in concentrating and distractability.
- For large class situations - small group activities led by advanced students may enhance the LD student's understanding of class/text material and interpersonal skills.
- In class lectures and demonstrations try to use concrete examples, dramatic attention-getting devices and practical applications to highlight important information.

A SUPPORT SERVICES PROGRAM

In order to assist an LD college student, the support services provided must be well planned and structured. This support can help the student have a successful college experience. A thorough educational assessment plan and effective implementation comes from an understanding of the LD student's strengths and weaknesses in acquiring knowledge. And yet, diagnostic workups are usually limited to basic IQ and achievement measures (Cordoni, 1982).

Due to the increased number of LD college students there is a dire need for trained personnel to develop, implement and evaluate college programs (Shaw, Norlander, 1986). It is critical for key personnel to have competence in the diagnosis of a learning disability and program planning (Shaw, McGuire, 1986).

Once a student has been clearly assessed and is willing to put forth the effort and extra time to help him/herself, it is then the role of the support services program to provide direct services to meet the individual needs of the LD student. Almost all LD college programs provide tutoring services for LD students (Cordoni, 1982). The key components to a successful program include:

- (1) Establishing an open and honest advocacy relationship between the service provider and student.
- (2) Focusing on specific instructional practices that further acquisition and generalization.
- (3) Ensuring that all pre-requisite skills have been mastered before proceeding with new material.
- (4) Providing sufficient practice and review of new concepts, principles, and information.
- (5) Designing and practicing appropriate learning strategies.
- (6) Encouraging participation in counseling sessions to deal with social/emotional concerns, when appropriate.
- (7) Encouraging self-advocacy and independence in the learning environment.

DIRECTOR/CONTACT PERSON

GENERAL INFORMATION ABOUT COLLEGE

- private or state institution
- enrollment
- tuition
- room and board

SPECIAL PROGRAM INFORMATION

- enrollment in special program courses
- cost

STAFF

- certified learning disabilities specialists
- special counselors

PROGRAM FEATURES

- individual tutoring sessions
- limited course load (first year)
- basic study skills courses
- small group tutoring sessions
- oral and untimed testing
- taped texts
- student/faculty ratio
- tape recorders
- computers, word processing access

ENTRANCE REQUIREMENTS

- documentation of learning disabilities
- testing assessment information, SAT, untimed accepted
- teacher evaluations
- personal interview
- handwritten essay
- motivation
- summer program

NATURE OF LEARNING DISABILITY

1. Have you ever been diagnosed as having learning disabilities:

yes no

If yes, please complete the following:

Diagnostician's name _____

Date of diagnosis _____

Please include a copy of this report.

APPLICATION FORM

SUPPORT SERVICES DEPARTMENT

Applicant's name _____

1. Did your school district's Committee on the Handicapped (COH) state that you have learning disabilities? yes no

If so, when _____

2. Have you received any additional instruction for your learning disabilities? yes no

If yes, please complete

- Reading Teacher
- Resource Room Teacher
- Mathematics Teacher
- Writing Teacher
- Speech/Language Therapist
- Psychologist
- Other (please list)

3. Have you received any other services or modifications for your learning disability? yes no

If yes, please complete:

- Recorded textbooks
- Taped lectures
- Person to take notes for you
- Untimes tests
- Written assignments which you have dictated
- Other (please list)

LETTER TO THE FACULTY

Our Special Educational Services Program serves the disabled population in a number of ways. We provide supportive academic, vocational and emotional counseling to students with learning disabilities on campus. There is a good possibility that these students will be enrolled in your courses during the academic year.

We encourage you to handle all matters directly with the students. However, if you would like assistance or should have any suggestions as to how our program might better support the special needs of these students, please feel free to call us.

Director of the Program -

Academic Counselor -

Tutorial Supervisor -

Thank you for your time and cooperation.

ONLY A SUGGESTION: We would encourage you to state at the bottom of your syllabus, and to announce at an early meeting of each of your classes, something to this effect:

If there is any student who feels that he or she may need an accommodation for any type of disability, please make an appointment to see me during my office hours.

This approach will preserve the student's privacy and indicate your willingness to provide assistance.

TEACHER CORRESPONDENCE: INITIAL ENROLLMENT

SUPPORT SERVICE PROGRAM

Date _____

Dear _____

_____ is enrolled in your _____ course.

This student requires support services while attending our college. Your cooperation and assistance are an essential part of our efforts to make the entire college program a successful one.

SPECIAL ACADEMIC NEEDS:

1. _____ The student would benefit from the use of a tape recorder in class.
2. _____ The student would benefit from the use of a note taker in class.
3. _____ The student would benefit from the use of taped textbooks.
Please send us the course book list.
4. _____ The student would benefit from special testing measures:
 - _____ additional time to take exams
 - _____ untimed exams
 - _____ someone to read exams and record answer for student
 - _____ oral exams
 - _____ someone to type/handwrite essays after student has written or dictated the information
5. _____ Specifics _____

6. _____ Individualized tutoring

7. _____ Would you please send us an academic progress report mid-semester?

If you have any questions or problems, please do not hesitate to contact this office. Thank you for your time and cooperation.

Student Signature _____

STUDENT SELF EVALUATION: MID-SEMESTER

At this point in the semester, you (the student) should be interested in finding out how you are progressing in each of your classes. Ask yourself the following questions for each course you are taking:

(1) Do I know how well I am doing in this course? (Circle one)

(2) How will my teacher determine my final grade? Check the ways your instructor will grade you.

tests

short quizzes

term paper

class participation _____

final exam

attendance

(3) What is my average in this class up to this point? pass/fail

(4) Have I participated in this class? (Circle one)

Never

•Occasionally

Often

(5) Do I have a term paper? When is it due

Have I talked to my tutor about it? .

(6) Have I handed in all of my assignments? _____ If not, can I hand them in late? _____ Have I talked to the instructor about this problem? _____

(7) Have I fallen behind in class? _____ How? _____ (assignments, make-up test, reading)

(8) Have I talked to the instructor about my problem? _____

TUTORING EXPERIENCE EVALUATION

SUPPORT SERVICES PROGRAM

In the course of study, we hope that you have benefitted greatly by the services this program has provided. We are interested in learning from the students who have been tutored by a student tutor what their reaction to the tutoring experience has been. Please answer the following questions in the space provided.

1. Who was/were your tutor(s)? _____
2. In what subject(s) did you receive tutoring? _____
3. Did the tutoring sessions help you to pass the course? Yes _____ No _____
4. How were you helped? _____
5. Did you attend your tutoring session regularly and on time? Yes _____ No _____
6. Was your tutor on time to the tutoring sessions? Yes _____ No _____
7. Were you prepared with textbook, pencil and assignment? Yes _____ No _____
8. Will you use the tutoring services again if you need help with a course? Yes _____ No _____

COMMENTS: _____
